## Industry's multi-directional lantern look light

The Cinelight Spacelight 3K is the ideal solution for photographers and videographers looking to evenly illuminate large area setups. The Space Light provides overall scattered light and is commonly used hanged on studio installations to fill the setups with a general soft overhead lighting. It is also an excellent light source for exterior setups to simulate the skylight.

individually controlled either on a dimmer or by individual on/off switches at the distribution point.

**Versatile  
Chinese  
lantern  
look  
fixture**

The Spacelight 3K can only work hanged by the included chains to a compatible hook or rig. The white silk skirt can be used to soften the light and get that Chinese lantern effect, while the black skirt reduces the output for a more directional control. At the bottom of silk cylinder is a round diffusion ring to which a diffusion material or gel can be clipped.

### **Solid metal construction with bottom legs for storage**

The rugged sheet metal construction of the lamphead features black powder coated enamel finish which is resistant to high temperatures. Three included legs can be easily screwed on the lamphead's base to safely stack the Spacelight for storage.

- includes white silk skirt for multi-

- directional Chinese lantern look
- includes black skirt for directional downward conned light effect
  - the lamphead is equipped with legs for easy storage
  - white skirt length: 55 cm
  - black skirt length: 65 cm

### TUNGSTEN - FLOOD
